## **Cleans 80,000 Automatic Loom Bobbins per Day**

That is the guarantee that goes with every "Utsman" Quill-Cleaning Machine.

The large output is due, primarily to the patented mechanical devices employed. The bobbins, after being dumped into the feed-chute, are handled automatically.

A cleaning efficiency of 98% is the usual result obtained. The best of materials, high class workmanship and durable construction are features of this machine.

# YARN TRADE INDEX

In this department will be found classified lists of manufacturers of different kinds of yarn, who sell their product. So far as possible the sizes of yarn which are made are given, and the form in which the yarn is put up. Dealers and commission merchants are not included in this list. There is a separate list following the list of yarn manufacturers in which are included such firms.

The publishers will be pleased to receive notice of any corrections that should be made. If any kinds of yarn are wanted which are not found in these classified lists, the publishers can probably supply the addresses of manufacturers or dealers from whom they can be obtained.

# The Basis of Quality Goods

For three-quarters of a century  
Cheney Silks have enjoyed a  
reputation for superior quality—a  
quality based on

## *Cheney Silk Yarns*

—uniform in strength, evenness,  
smoothness, lustre and color.

Back of these yarns—used to form  
the background of quality so essential  
to the many other manufacturers to  
whom they are sold by Cheney Brothers  
—is the Cheney reputation for fair  
dealing built up in 75 years of pains-  
taking care.

### Have You Ever Stopped to Consider What Tangles and Tears Your Skein Yarn;

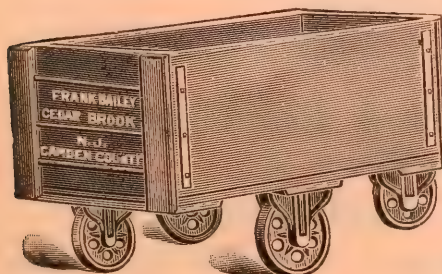

what causes so much waste; why there is so much trouble in your winding, and so many knots in your yarn? Have you ever examined your dye sticks, dry poles and your trucks, to see if your sticks are smooth, and that your trucks have no places for yarn to catch on and tear the skein? It would pay you to go over these things once in a while. This would save burling and mending, and would help your production in the loom.

I am now supplying over 700 mills and dye houses in U. S. and Canada with **DYE STICKS**, drying and sulphur house poles, wringing sticks, trucks for dry rooms, dye houses and mill purposes. **My trucks have self-oiling wheels.** They are smooth. Yarn will not catch on them. They are properly balanced. I build any truck required.

Let me know what you need. Give me a chance to demonstrate my goods.

# ALPHABETICAL INDEX

—TO—

## The Textile Establishments OF THE UNITED STATES AND CANADA

The following index is an alphabetical arrangement of all the textile establishments in the United States. Following the name and address of the establishment, the character of the mill is designated by letters, thus:

(C) means a cotton mill (K) means a knitting mill (F) means a finishing establishment  
(W) means a woolen mill (Fl) means a flax mill (J) means a jute mill  
(S) means a silk mill (D) means a dye works (A) means asbestos  
(Bl) means a bleachery

The number which follows indicates the page upon which the full particulars of the mill will be found.

It frequently happens that an establishment is listed under two names, viz.: proprietor's or company's name and also the name of the mill, as for example, Wm. F. Reed & Sons Co., Victoria Mill, Philadelphia, Pa. In the alphabetical index this is listed as follows: Wm. F. Reed & Sons Co., Philadelphia, Pa., also Victoria Mill (Wm. F. Reed & Sons Co.) the page number being given in both instances, but in the case of the second name the address is not given, so that if this index is used for addressing purposes, no duplicates will be made if directed only to the names which have addresses.

As the body of the directory is arranged alphabetically by states, towns and establishments it is, therefore, self-indexing, and any mill can be readily found through one or the other system of classification, viz.: by its name in the alphabetical index, or by its location in the body of the book, where full particulars about each mill will be found.

YOU ARE INTERESTED IN WEAVE ROOM EFFICIENCY?  
LET US SHOW YOU WHERE AND WHY LEADING MILLS  
ARE INSTALLING K-A. IT IS AN INTERESTING RE-  
CITAL OF FACTS.

WHY DO MILLS DISCARD OTHER "MOTIONS" AND  
REPLACE THEM WITH K-A?

WHY DO MILLS BUY LOOMS WITHOUT WARP STOPS  
AND EQUIP THEM WITH K-A?

WHY DO MILL EXECUTIVES, AFTER EXPERIENCE  
WITH OTHER "MOTIONS" SELECT K-A FOR NEW

# Diamond-Fibre Roving Cans

THESE cans are exceedingly strong, tough, and durable. The interior surface is smooth. They are of true diameter; the bottoms are hard wood, accurately placed and balanced—thus the cans revolve truly. As the color is IN the fibre and not painted ON it, the cans can never become unsightly from accidental chipping and rubbing.

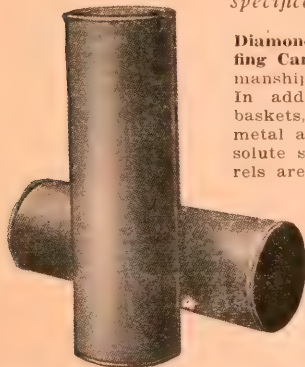

*Standard sizes or can be made to any specifications. Two colors—red and gray.*

**Diamond Fibre Boxes, Baskets, Barrels, Doffing Cars, Trucks, etc.,** are identical in workmanship and material as the Roving Cans. In addition, the top edges of the boxes, baskets, barrels and trucks are bound with metal and in such manner as to produce absolute smoothness. The bottoms of the barrels are of hard wood.

*Prices and full information concerning all these specialties sent on request.*

### Cameron Principle Slitting and Rewinding Machine

for converting wide webs of any kind of material into strips of any width and rolling up the strips into firm coils all at one operation. 10,000 to 15,000 yards of cloth handled by one operator in a nine hour day.

#### The Same Machine

is also the ideal rolling up machine for wide webs required to be put up in the form of firm even rolls.

Increase in sales and profits await the manufacturers and wholesalers who are willing to oblige customers by putting up their goods in a form most convenient to handle.
